

ABOUT PROPERTY EYE

Redefining Trust in Real Estate Operations

Property Eye is a UK-focused fraud detection and monitoring platform built to help real estate agencies protect what they earn. We give agencies clear, ongoing visibility into commission activity, helping them identify irregularities early and reduce revenue loss without disrupting day-to-day operations.

Our role is simple: to help agencies stay in control. We monitor patterns, highlight risks, and surface insights that would otherwise remain hidden, allowing leadership teams to act with confidence and clarity.

Enterprise-grade security underpins everything we do, ensuring sensitive agency data remains protected at all times.

OUR MISSION

Our mission is to help real estate agencies across the United Kingdom safeguard their revenue by detecting and monitoring commission fraud before it becomes costly. As agencies grow more complex, so do the risks they face. Property Eye exists to provide consistent oversight, accountability, and peace of mind — regardless of an agency's size or structure.

OUR STORY

Property Eye was not built overnight. It emerged from close observation of how commission leakage quietly affects agencies of all sizes.

2024 — The Idea

The initial idea for Property Eye was formed in 2024, driven by conversations with agency leaders who suspected revenue loss but lacked the tools to confirm it. What stood out was not just the scale of the problem, but how difficult it was to spot using traditional processes.

2025 — Understanding the Problem

In 2025, deeper analysis confirmed the extent of the issue. Patterns of commission avoidance, inconsistent disclosures, and internal blind spots were more common than expected. Agencies were not failing due to negligence — they simply lacked visibility. This period shaped the principles behind Property Eye: continuous monitoring, clarity, and accountability.

2026 — Launching Property Eye

Property Eye launches in 2026 with a clear purpose: to give agencies a reliable way to monitor commission activity and identify fraud risks in real time. The platform is designed to scale naturally with each agency, delivering the same level of protection whether managing a single office or multiple branches.

WHAT WE BELIEVE

Our values guide how we build, communicate, and support our clients.

Integrity

Trust is the foundation of our platform. We believe agencies deserve clear, honest insight into their operations without unnecessary complexity or hidden agendas.

Transparency

Visibility creates accountability. Property Eye is designed to surface meaningful information in a way that supports informed decision-making, not confusion.

Revenue Protection

Commission income is the lifeblood of an agency. We are committed to helping agencies protect what they earn by reducing exposure to avoidable loss and ongoing risk.

THE TEAM

The Minds Advancing Fraud Monitoring

Property Eye brings together professionals with backgrounds in real estate operations, risk oversight, and data analysis. Our team understands the realities agencies face and builds solutions that reflect practical, real-world challenges — not theoretical ones.
